Description | Screenshots | Reviews

EasyLockdown is a simple but powerful access management tool to fuel up your BigCommerce store by granting access to certain Categories, Products or Whole website to certain group of customers only.

App is easy to use and doesn't require any coding skills.

Using EasyLockdown you may:

- Completely lock down your entire site in one click;
- Limit access to certain Products or Categories;
- Lock your content with password;
- Redirect customers to standard login form, or your custom page.

5. Then you will be asked to approve of the applications access to your store. Once it's done, the application will be installed to your store.
